Learn more about the program

The selection process consists of a phase of abilities examination and another one of examination of suitability for the profession.

The program consists of two phases:

Phase 1

Training is the first phase that will take place once a week on sundays from 18:00h to 20:00h for a period of three months. The location of this training will be given later, which will take place in the center of the country.

Phase 2

The phase two will take place after successfully completing the training and passing the exam to assess their understanding of the material they learned. Those who passed successfully will be offered a job to work as an analyst. Those who did not pass, can repeat the course again.

Course description

Introduction to creating an independent trader. The program starts with a beginner's course and finalizes with an advanced course where original models will be taught for immediate use in markets.

Beginner course

Table of contents

1. Introduction

Brief explanation of what we will learn as a basis and what it will give us in the future.
